

Task 2 - Directives

Part 1:

- Create a component called *ClientList*, this component will display a list of clients.
- Create a component called *ClientCard*, in which you should display the main client information.
- In the *ClientCard* component, add a 'view more' button to view the rest of the client's fields.
- When all of the client's information is shown, the 'view more' button should be displayed as 'view less', and upon click, should hide the info.
- A client's status is a numerical value, it can be 0, 1 or 2. 0 means deleted, 1 means active, and 2 means inactive.

Part 2:

- Create a component called *AccountInfo*, in which you will display the account information.
- This component will also have 3 tabs: Main Address, Departments and Contacts.
- When you click on each tab, the corresponding information will be shown.

Part 3:

Rewrite the NgIf directive.
